## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of group II, claims 28 - 31 in the reply filed on October 6, 2009 is acknowledged. The traversal is on the ground(s) that the groups have the same technical feature. This is not found persuasive because while the groups may have a similar or the same technical feature, the groups do not have a special technical feature which contributes over the prior art as indicated by the cited references below.

The requirement is still deemed proper and is therefore made FINAL.

Claims 20 – 35 are pending; claims 20 – 27 and 32 – 35 are withdrawn as being drawn to non-elected subject matter; claims 28 – 31 have been considered on the merits.

### ***Claim Objections***

2. Claim 28 is objected to because of the following informalities:

The claim fails to end with a period.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1651

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 28 – 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Wennemuth et al. (1997).

Wennemuth teaches a method comprising adding fibronectin to a sperm sample, wherein the sperm exhibit a reduced, or low motility (abstract, entire reference).

Although the reference does not teach the method to conserve sperm, the method steps are the same. Thus, the methods must also inherently conserve the sperm sample. Therefore the reference anticipates the claimed subject matter.
